

IMMULITE 2000/2000 XPi Immunoassay System

# Menu versatility meets proven reliability

Expand capabilities and adapt to changes in demand with a single, cost-efficient analyzer

# Achieve workflow stability in an ever-changing diagnostic landscape

Despite increasing demand for in vitro testing, many laboratories are facing shrinking budgets, dwindling reimbursement rates, and staff shortages. Consolidating your routine immunoassay testing on one of the industry's most recognized, reliable, and easy-to-use solutions makes it easier to adapt to changes without disrupting regular day-to-day operations.

"No pause" sample loading allows instrument to continue processing samples when new samples are added.

The **IMMULITE® 2000/2000 XPI Immunoassay System** offers high-quality, automated assays across a wide variety of disease states.

**Leading reliability and quality**

- Achieve consistent, accurate detection of disease with highly sensitive assays.
- Minimize repeats and dilutions by measuring a wide range of analyte concentrations.
- Reduce reagent hands-on time and waste with automatic resealing of liquid reagents, refrigerated carousel, and 90-day onboard stability for all reagents, including specific allergens.

**Broad menus and innovative uses for assays**

- Gain access to a broad menu of 98 assays—including an expansive menu of >500 allergens for testing a broad range of diseases—on one platform.
- Support multispecies and canine testing with applications for thyroid and metabolic disease states.

**Simplicity and automation**

- Minimize operator error and training with easy-to-use software.
- Realize true walkaway capability with high onboard capacity.
- Reduce batch loading and significantly improve turnaround time with no-pause sampling.

## Routine testing done right

The IMMULITE 2000/2000 XPi Immunoassay System offers quality, simplicity, and dependable versatility to efficiently meet changing demands.

- Automated sample-rack loader\* **improves productivity by eliminating pauses** to load a new rack of samples
- Constant monitoring of bulk supplies and ability to load up to 1300 reaction tubes **enables up to 5 hours of usable walkaway time.**†
- Self-acting daily startup\* performs daily maintenance checks and QC in just 15 minutes, **eliminating the need for hands-on operator time.**

### Allergy, specialty, and routine testing—all on one platform

Allergy	Growth	Special ID
Anemia	Hepatitis	Therapeutic Drug Monitoring (TDM)
Autoimmune	Inflammation	Thyroid
Bone Metabolism	Metabolic	TORCH
Cardiac	Oncology	Other
Diabetes	Reproductive Endocrinology	Veterinary

\*IMMULITE 2000 XPi Immunoassay System only. Product availability varies by country.

†When instrument is fully loaded and has an empty waste bin.

## Transform care delivery at every stage of the diagnostic process

### Care delivery

Innovative features simplify lab activities, which can improve turnaround times and give physicians quicker access to important diagnostic information.

### Operational efficiency

Automated daily maintenance, long onboard stability, and high reagent capacity increase uptime and reduce hands-on time for operators.

### Patient experience

Microsampling capabilities support low-volume samples for fast, accurate testing on even the most vulnerable patient populations.

**Consolidating routine testing with the IMMULITE 2000/2000 XPI Immunoassay System makes it simple to adjust to changes in demand and scale capabilities without disrupting day-to-day operations.**

- Cost efficiency combined with proven reliability.
- Menu consolidation and workload flexibility.
- Multiple benefits—one versatile system.
